

Clean

Clean5

5% Stabilized Hydrogen Peroxide

Food Contact Sanitizer

Clean5 Food Contact Sanitizer is a superior, food-grade, stabilized hydrogen peroxide. Providing a one-step process, it eliminates the need to rinse with water to remove toxic chemicals. **Clean5** is an effective sanitizer for use in the food processing industry, dairy industry, food retail, and beverage industry.

SanEcoTec has been issued a Letter of No Objection (LONO) by Health Canada accepting use of **Clean5** as a sanitizer without a subsequent potable water rinse on food contact surfaces in food processing establishments.

Benefits

- Leaves no residue which can compromise the quality of the end-product
- Protects the integrity of the equipment
- Effective microbiological control
- More effective use of water consumption
- No rinse required when used as instructed

Properties

- Easy-to-use
- Does not foam
- Odourless, colourless and tasteless
- Creates no known disinfection by-products
- Environmentally friendly
- Breaks down into water and oxygen
- Works over a wide range of temperatures and pH
- Superior stability in water keeps effectiveness longer

Applications

- Sanitizing of hard surfaces, equipment and workstations

Clean5 is biodegradable (in accordance with the AFNORT 73260TM directives).

International Quality System Certification:
ISO 9001

AVAILABLE
PACKAGE SIZES:
5 kg

Ingredients: Ultra pure water, hydrogen peroxide 5% (w/w)

SanEcoTec® is a Canadian company that creates healthy water programs, systems and products for cities, homes, healthcare and agriculture.

The Company is known for innovation in natural and sustainable technologies.

5% Stabilized Hydrogen Peroxide

Food Contact Sanitizer

Directions

It is a violation of Federal law to use this product in a manner inconsistent with the label.

Food Preparation & Surface Sanitizing

- First, clean the food contact surfaces, floors, and walls which are to be treated and rinse with potable water
- In a clean sprayer, dilute 20 mL of the product into 1 L of water to make a 1000 ppm solution
- Spray liberally with a 1000 ppm solution covering the whole surface. Leave on surfaces for at least 5 minutes
- Remove excess product afterwards
- Product is not slippery, floors may be left to dry naturally or use squeegee to dry
- Unused dilution of the product should be used within 3 days or discarded and fresh in-use dilution prepared

Food Processing Equipment & Material

- Clean all materials and rinse with potable water
- To make a 1000 ppm solution, dilute 200 mL of the product into 10 L of water in a stainless steel or plastic bath
- Submerge the processing materials in a 1000 ppm solution for at least 5 minutes. No rinse required when used as instructed
- Take out of the bath to drain excess product

Clean5 is biodegradable (in accordance with the AFNORT 7326OTM directives).
NSF STD 60 approved max 16 mg/L.
