

# AVIVE Water Health Course

## Water Quality Management Training

As a first line of defense, operators must be trained in water quality.

Know What to Measure

Know How to Detect

Know How to Solve

<b>Module 1</b> Water is finite; it matters how it's treated	<b>Module 2</b> Physical, chemical and biological properties of water	<b>Module 3</b> What it takes to keep water potable & food safety	<b>Module 4</b> Multi-barrier; the right tool for the job	<b>Module 5</b> Microbiology overview; microbiomes & testing	<b>Module 6</b> Sanitize vs disinfect; prevention vs remediation	<b>Module 7</b> SMART monitoring and control	<b>Module 8</b> Water Health Index & KPI mapping
---	--	--	--	---	---	---	---

## WHY TRAINING?

- Peak performance in every operation always includes high-performance water
- Water is variable - it changes like the weather - yet its critical components can be measured, controlled and managed - and ultimately, optimized
- By applying the learning acquired in the AVIVE Healthy Water Course, personnel will be able to manage risk and develop an integrated water quality plan that supports overall production

SanEcoTec® is a Canadian clean-tech company that creates healthy water programs and SMART systems for better water management.

The Company is known for innovation in sustainable technologies.

SanEcoTec® Ltd. 5636 Manotick Main Street, AVIVE® House, Ottawa, ON K4M 1B3
